DETAILED ACTION

Election/Restrictions

Claims 4-10 are withdrawn from further consideration pursuant to 37 CFR 1.142(b), as being drawn to a nonelected invention, there being no allowable generic or linking claim.

Applicant timely traversed the restriction (election) requirement in the reply filed on June 1, 2004.

Applicant's election with traverse of Group I in the reply filed on June 1, 2004 is acknowledged. The traversal is on the ground(s) that there is a coextensive. This is not found persuasive because (1) applicants have failed to show that a coextensive search is a reason for not requiring a restriction requirement, (2) there is no coextensive search because claim 1 as claimed does not require a particular air amount control device as required in claims 4 and 5, (3) it is a serious burden on the Examiner to have to examine numerous patentability distinct inventions having numerous and diverging issue of patentability, especially when a patent application is limited to one invention.

The requirement is still deemed proper and is therefore made FINAL.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(a) the invention was known or used by others in this country, or patented or described in a printed publication in this or a foreign country, before the invention thereof by the applicant for a patent.

Art Unit: 3747

Claims 1-3 and 11 are rejected under 35 U.S.C. 102(b) as being anticipated by the Japanese patent application 10-89140* . The Japanese patent discloses a controller which delays a response of the intake air amount control device with respect to the depression of the accelerator pedal (the applicant's specification page2, lines 3-14).
